## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on Apr. 21, 2006 has been entered.

2. Claims 1, 9, and 18 have been amended.

### ***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 1- 21 are rejected under 35 U.S.C. 102(e) as being anticipated by Chang et al. (2001/0041553).

Regarding claim 1, Chang discloses a system and method for providing intelligent wireless access systems, comprising:

wireless connection devices for preparing for connection to a wireless terminal in a service region, and outputting information related to an exhibition for the wireless terminal through a network (see fig.1, 106-110, 114, 100, and its description); and

an exhibition information server for processing the exhibition information service corresponding to the information related to the exhibition inputted from the network, wherein the connection is automatically initiated when wireless terminal enters the service region (see fig.1, 120, fig.2, and its description).

Regarding claims 2-4, Chang further discloses a wire communication processing unit for transmitting a signal from the wireless terminal to the exhibition information server through the network, and receiving data from the exhibition information server through the network (see fig.1, elements 102, 120 and its description); and

a wireless communication processing unit for receiving the signal from the wireless terminal, and transmitting the data through air according to a data transmission request signal output from the exhibition information server through the network and received in the wire communication processing unit (see fig.1, elements 102, 106, 120 and its description).

Regarding claims 5-8, 10-17, Chang further discloses each of the wireless connection devices further comprise a control unit for setting up an address for connection and communicating with the wireless terminal, when receiving a connection request signal from the wireless terminal, and for controlling the connection or disconnection of the wireless terminal (see figs.1-4, fig.2, steps 202-218 and its description).

Regarding claims 9, and 18-21, Chang discloses a system and method for providing intelligent wireless access systems, comprising:

a wireless connection step for preparing for connection to a wireless terminal in a service region, and outputting information related to an exhibition for the wireless terminal through a network (see fig.1, element 114, 100, fig.2, steps 202-204, and its description); and

an exhibition information service step for inputting the information output by the network and processing an information service corresponding to the information input from the network, wherein the connection is automatically initiated when the wireless terminal enters the service region (see fig.1, 120, fig.2, steps 206-216 and its description).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to CongVan Tran whose telephone number is 571-272-7871. The examiner can normally be reached on Monday-Thursday.
